DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

Restriction

1. This application is in condition for allowance except for the presence of claims 1-10 and 23-51 is directed to an invention non-elected with traverse in the reply filed on 4/23/08.

Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

Claim Objections

2. Claims 11-22 are objected to because of the following informalities: In claim 11, it's not clear as to what applicant means by "a transistor" in lines 5-6? Does applicant mean that it's a second transistor? Or is it the same transistor as recited in lines 2-3 in the claim. If the transistor in lines 5-6 is the same transistor as recited in lines 2-3 (in claim 11). Then "a transistor" (in lines 5-6) should be changed to: --the transistor--. Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

3. Claims 11-22 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The prior art of record and to the examiner's knowledge does not teach or render obvious, at least to the skilled artisan, the instant invention regarding a semiconductor device comprising: a first circuit section and a second circuit section are formed to be including a transistor; a first pad and a second pad supply the first and second potential to the first circuit section; a third pad and a fourth pad supply the third and fourth potential to the second circuit section; a first bus-bar and second bus-bar are arranged along the direction where the first pad and the second are arranged, arranged between a plurality of inner leads and the first and second pads, connected to the first pad and second pad by a wire, and supplied with the first potential and second potential; and a third bus-bar and fourth bus-bar are arranged along the direction where the third pad and the fourth are arranged, arranged between a plurality of inner leads and the third and fourth pads, connected to the third pad and fourth pad by a wire, and supplied with the third potential and fourth potential, as recited in independent claim 11. Claims 12-22 are dependent upon independent claim 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
